7. Superintendent's Comments
8. Adjournment

Meeting Date  
June 19, 2008

Warren County School District  
**BOARD AGENDA ITEM**

Agenda Item No.  
5.1

Item Title: Career-Technical Education Local Planning System

Prepared by: Mr. Hudgins Approved by: Dr. Ray V. Spain Date: June 19, 2008

Recommendation:

The Superintendent recommends that the Board approve the Career-Technical Education Local Planning System.

Supporting Information:

The Career-Technical Education Courses offered in Warren County Schools provide all our middle and high school students the opportunity to explore career interest and choices, and make career decisions. The Local Planning System (LPS) is the vehicle for providing these courses. This plan does not change a great deal from year to year, but it is updated each year and needs to be approved by the Warren County Board of Education and The Department of Public Instruction (Regional Coordinator) before it is implemented. As curriculums develop at Warren New Tech and Warren Early College High Schools, Career-Technical Education courses will be available as it fits into their course of study.

Warren County Schools  
Career-Technical Education Local Planning System (LPS)  
2008-2009

## **EXECUTIVE SUMMARY**

The Local Planning System (LPS) is the vehicle for strategic planning, managing performance, and assuring accountability for Career and Technical Education (CTE). The LPS incorporates the requirements of all applicable state and federal laws which govern CTE in North Carolina. This application must be submitted to the Department of Public Instruction and approved by them in order to receive and use state and federal funds for Career and Technical Education Programs and Services in grades 6-12 in Warren County for the 2008-2009 fiscal year.

Career and Technical Education is conducted in the middle and high schools in Warren County – grades 6-12. Supporting Warren County's academic foundation is a diverse career and technical curriculum in which students are provided opportunities to make classroom instruction relevant to real world situations. Warren County Schools Career and Technical Education courses provide students with a variety of options to fulfill the requirements for College Tech Prep, College Prep, Occupational Course of Study, and the North Carolina Academic Scholars Program. Student credentialing and certification opportunities as well as work-based learning opportunities are available in selected program areas. Career and Technical Education student organizations are an integral part of CTE programs. The ultimate goal of CTE is for our graduates to become successful in a career and contributing members of society. CTE serves 100% of the middle school students in a comprehensive computer technology program that includes three business education courses. These courses deliver appropriate instruction in computer literacy and allow students to explore career decision making as well as develop future four-year educational plans. CTE offers 56 high school course offerings in all 10 career pathways. Expanded course offerings are available through Vance-Granville Community College where we have an articulation agreement.

The major thrust for CTE in Warren County Schools include providing appropriate career pathway opportunities; offering credentialing for students; providing appropriate CTE courses for high school students; and supporting high school reform. We will continue to provide opportunities for professional growth for CTE staff and encourage and support National Board Certification. Activities and priorities will support the mission of CTE which is to help empower students for effective participation in an international economy as world-class workers and citizens.

Listed below are Career and Technical Education (CTE) courses offered at Warren County Middle School and Warren County High School. Currently, there are no CTE courses offered at Warren New Tech High School and Warren Early College High School. We will work with these two schools to add CTE courses to their curriculum as they are needed.
